The following is an examiner's statement of reasons for allowance: The piston stopper with an uncoated sealing section having at least two continuous sealing lips spaced-apart by a continuous recess and an annular continuous sealing zone or second portion projecting slightly radially beyond a surface of the entire edge region of the inert film where the entire edge region of the inert film flatly abuts in a working position against a syringe or carpule cylinder in combination with the other structural components of the piston stopper was not found in the prior art.
